

YOUR BOOKKEEPING GUIDE

Small Business Profit Plan

Know your profit, every month.

What came in, what went out, what the business really made and how much tax to set aside, in one file on your own computer.

ONE FILE · WORKS OFFLINE · YOUR OWN BACKUPS

What you downloaded.

Read this page first. The rest is here whenever you need it.

FILE	WHAT IT IS
SmallBusinessProfitPlan.html	The whole app, in one file. This is the product.
Small_Business_Profit_Plan_Guide.pdf	This guide.
START_HERE.txt	The short version of this page.
LICENCE.txt	What you may and may not do with the file.

The HTML file is not a document that opens an app: it **is** the app. The code, fonts and charts are all inside it, and nothing is downloaded when you use it.

Setting up: about ten minutes

1. **Extract the ZIP** into a folder you will find again. A synced folder (iCloud Drive, Dropbox, OneDrive, Google Drive) is ideal.
2. **Double-click SmallBusinessProfitPlan.html**. It opens in Chrome, Edge, Safari or Firefox like a web page, and works offline from then on.
3. **Take the welcome tour**. A few short slides on logging entries, profit, tax money and backups.
4. **Follow the five steps** on the Dashboard: your name and currency, your sales channels, your monthly targets, your first entries, and a backup.
5. **Download a backup** from Settings & backup. Page 9 explains why it matters more than anything else here.

Want to look around first?

Choose **Explore sample data** on the Dashboard or in Settings & backup. Juniper Studio, a fictional design studio with an Etsy shop, fills every screen with ten months of sales, costs, invoices and trips, in a separate session. **Return to my books** brings back your own, untouched.

Every dollar in, every dollar out.

The Dashboard answers the monthly question: what came in, what went out, what the business kept, and what you owe.

EACH WEEK

Log it, or import it.

Transactions → **Add transaction** takes seconds: date, amount, category and channel. Or **Import CSV** once a month.

Who still owes you.

Invoices → **Add invoice** for each bill you send. When the money arrives, **Mark paid** and it becomes revenue on that day.

How late is the money? Open invoices grouped by days past due, so the oldest are chased first.

Reminder A friendly payment reminder, filled in from the invoice, ready to copy into an email.

Undo paid Marked one paid by mistake? One click puts it back, and the revenue entry goes too.

Set tax aside as you go.

Quarterly tax works out what you should have put aside by each due date, at the rate you set (25% to start), and whether your pot covers it.

TAX SET-ASIDE · 2026

Put the tax money aside as you go

Log a set-asideChange rate

A rule of thumb: 25% of net profit goes to your tax pot.

Not tax, legal or financial advice. Small Business Profit Plan organises your own records and applies the rates and rules you enter. Tax rules differ by country and change every year. The due dates below follow the US estimated-tax calendar; outside the US, use the set-aside figures with your own country's payment dates. Check with a qualified tax professional or accountant before you file, claim or pay tax.

Net profit to date

\$36,712.36

Through October 2026

Should have set aside

\$9,178.09

25% of net profit so far

Set aside so far

\$12,600.00

Tax savings transfer + Income tax paid (estimated & year-end)

Ahead by

\$3,421.91

Your pot covers the rule of thumb

Q1 · JAN – MAR

Due date passed

Due Apr 15, 2026

Net profit	\$8,854.60
Should set aside	\$2,213.65
Set aside	\$4,200.00
Pot at period end	\$1,986.35 ahead

Q2 · APR – MAY

Due date passed

Due Jun 15, 2026

Net profit	\$6,168.48
Should set aside	\$1,542.12
Set aside	\$2,800.00
Pot at period end	\$3,244.23 ahead

Q3 · JUN – AUG

Due date passed

Due Sep 15, 2026

Net profit	\$14,158.60
Should set aside	\$3,539.65
Set aside	\$4,200.00
Pot at period end	\$3,904.58 ahead

Q4 · SEP – DEC

Next due

Due Jan 15, 2027

Net profit	\$7,530.68
Should set aside	\$1,882.67
Set aside	\$1,400.00
Pot at period end	\$3,421.91 ahead

Should have vs have, month by month

A month's share is the change in what the year needs. A loss month lowers it.

Should set aside

Set aside

Log a set-aside

Each time you move money to your tax savings, log it. The pot and “ahead by” update straight away.

Change rate

Ask your tax pro what share of profit to keep back, and set it here. The due dates are the usual US estimated-tax dates.

Schedule C, ready for your accountant.

Every category sits on its Schedule C line, so the year’s summary builds itself. **Print** it or download the **Summary CSV**.

SCHEDULE C · 2026

A summary your accountant can work from

Schedule C (Form 1040) · Profit or Loss From Business. Recorded through Oct 20, 2026. Cash basis.

Profit & loss for 2026 --

Summary CSV

Transactions by line CSV

Print

Not tax, legal or financial advice. Small Business Profit Plan organises your own records and applies the rates and rules you enter. Tax rules differ by country and change every year. The line numbers follow the US Schedule C (Form 1040); outside the US, use the category totals as a starting point for your own return. Check with a qualified tax professional or accountant before you file, claim or pay tax.

Gross receipts

\$57,137.00

Line 1 · 2026

Gross profit

\$52,900.84

Line 5 · after \$4,236.16 cost of goods

Total expenses

\$16,718.66

Line 28

Tentative profit

\$36,182.18

Line 29 · before home office

SCHEDULE C WORKSHEET

Juniper Studio

Prepared Oct 20, 2026 from Small Business Profit Plan. Organised records, not a filed return.

Tax year 2026 · Jan 1 – Oct 20, 2026

Cash basis · USD

PART I · INCOME

1	Gross receipts or sales	\$57,137.00
	Client projects · Product sales · Retainers & subscriptions	
4	Cost of goods sold (from line 42)	\$4,236.16
5	Gross profit	\$52,900.84
6	Other income	—
7	Gross income	\$52,900.84

PART II · EXPENSES

Mileage log

Log a trip: date, purpose, route and miles. The value is worked out at your rate (set it in Settings), and **Export year CSV** gives your accountant the list.

Profit & loss

Month, quarter, year to date, full year or your own dates, for the whole business or one channel. **Print statement** or **Download CSV**.

The screens.

Turn off any you don't use in Settings & backup → **Simplify your sidebar.**

SCREEN	WHAT IT IS FOR
Dashboard · Transactions	The month at a glance; every entry, searchable, with bulk edit and Undo.
Profit & loss · Annual overview	The statement for any dates; the year month by month.
Year over year · Cut costs	This year against last; where trimming a cost adds up most.
Business health · Weekly review	Runway, break-even and margins; a five-minute check-in.
Monthly targets · Recurring costs	What you expect each month; subscriptions and bills that repeat.
Reserves & goals · Calendar	Tax pot and savings goals; what's due when.
Invoices · Quarterly tax	Money owed to you; tax to set aside.
Schedule C summary · Mileage log	The tax worksheet; business trips. Export as CSV.

Every table sorts, searches and filters. Every screen prints.

Keeping your books safe.

Everything lives in your browser, on your device. Nothing is sent anywhere, there is no account, and nobody else holds a copy, including us.

Your entries live in browser storage: please read

- Everything you enter or import is saved automatically in that browser's local storage.
- Clearing your cache, history or site data will permanently delete it.
- It does not carry across browsers: data added in Chrome will not appear in Safari.
- The HTML file does not contain your entries. Copying the file does not copy your data.

Do one of these. Ideally both.

Download backup: every browser

Settings & backup → **Download backup**. One JSON file holding every transaction, invoice, trip, target, category and setting. **Restore backup** brings it back on any computer. The app reminds you when a backup is due.

Daily folder backup: Chrome or Edge

Choose a synced folder once (iCloud Drive, Dropbox, OneDrive, Google Drive) and a dated copy is written each day you make changes. Safari and Firefox do not offer this; use Download backup instead.

Moving to another computer

Copy the HTML file and your latest backup across, open the file, then Settings & backup → **Restore backup**.

A few useful fixes.

WHAT YOU SEE	WHAT TO DO
It opens as code, not an app	Extract the ZIP first, then right-click the file → Open with → your browser.
My numbers are gone	Check it is the same browser and profile you used before. Otherwise, Restore backup.
Profit looks too low	A transfer to savings or an owner's draw may be filed as an expense. Change its category to a transfer.
A sale shows twice	A platform's deposit in your bank was filed as revenue as well as its statement. Change the deposit's category to the payout transfer; imports do this for Etsy, Shopify, PayPal and Stripe.
An invoice isn't in revenue	Invoices count when they're marked paid. Open Invoices → Mark paid .
My PDF statement won't import	Only CSV downloads can be read. Look for "Export" or "Download CSV" in online banking.
Folder backup unavailable	Use Chrome or Edge on a computer, or Download backup instead.
The currency is wrong	Settings & backup → Currency, or type your own symbol. Amounts are not converted.
I want the tour again	Settings & backup → Welcome tour → Show tour.

We can help

Thank you

If Small Business Profit Plan earns its place, a review genuinely helps a small shop. And if it does not, tell us before you leave one: most things are fixable.
