

YOUR HOW-TO GUIDE

Shop Insights

Every Etsy shop you run, understood.

Drop in the files Etsy already gives you. See what each shop really keeps after every fee, which products make money, and what to set aside for tax.

ONE FILE · WORKS OFFLINE · YOUR OWN BACKUPS

What you downloaded.

Read this page first. The rest is here whenever you need it.

FILE	WHAT IT IS
ShopInsights.html	The whole app, in one file. This is the product.
Shop_Insights_Guide.pdf	This guide.
START_HERE.txt	The short version of this page.
LICENSE.txt	What you may and may not do with the file.

The HTML file isn't a document that opens an app: it **is** the app. Everything is inside it, and your Etsy files are read on your own computer. Nothing is uploaded.

Setting up: about fifteen minutes

1. **Extract the ZIP** into a folder you'll find again. A synced folder (iCloud Drive, Dropbox, OneDrive, Google Drive) is ideal.
2. **Double-click ShopInsights.html.** It opens in Chrome, Edge, Safari or Firefox like a web page, and works offline from then on.
3. **Take the welcome tour.** A few short slides: importing, take-home, profit and backups.
4. **Add your shop and import your Etsy files** (pages 3 and 4).
5. **Download a backup** from Settings & backup. Page 12 explains why.

Want to look around first?

Choose **Explore sample data** in the sidebar. Two made-up shops fill every screen, in a separate session. **Return to my shops** brings your own numbers back, untouched.

Download these from Etsy.

Shop Insights reads the files Etsy already gives you. Download them for each shop.

FILE	WHERE TO FIND IT
Sold order items	Shop Manager → Settings → Options → Download Data → Order Items. One file for the whole year is fine. Start with this one.
Payment account statements	Shop Manager → Finances → Monthly statements → Download CSV. One per month: the exact fees, ads and Etsy Plus.
Listings	Shop Manager → Settings → Options → Download Data → Listings . Optional: photos, tags and listing health.
Etsy Payments deposits	Shop Manager → Settings → Options → Download Data. Optional: what reached your bank.
Reviews	Your Etsy account → Privacy settings → Download data (reviews.json). Optional.

More than one shop?

Etsy downloads the shop that is open in Shop Manager. Switch shops on Etsy first, download that shop's files, then import them into the matching shop in Shop Insights.

Your buyers' privacy

The sold order items file includes names and addresses. Shop Insights keeps only the country and a scrambled key to count repeat buyers. Names, emails and addresses are never stored.

BRING IT IN

Import, in one go.

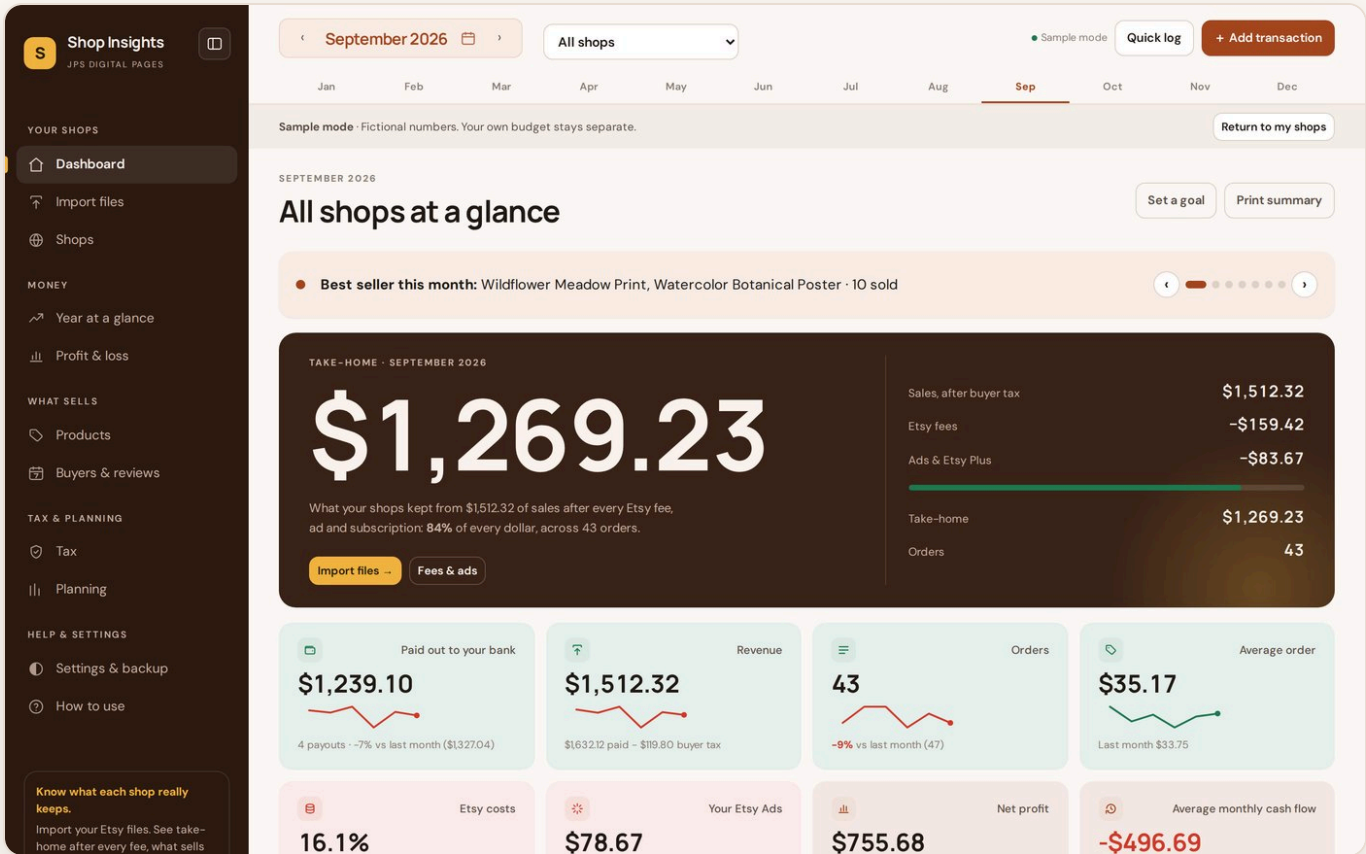

Import files in the sidebar: choose the shop, then drop in every file at once.

IT HANDLES	HOW
Several files at once	Each file is recognized by what's inside it, whatever it's called.
The same file twice	Every order, line and review is recognized, so nothing ever counts twice.
The wrong shop	Under Imported files , move a file to another shop, or delete it, with undo.
Months with no statement yet	Estimated from your orders at your fee rates, then replaced by the statement when you import it.

What each shop really keeps.

The dashboard answers one question first: after Etsy, what did you take home this month?

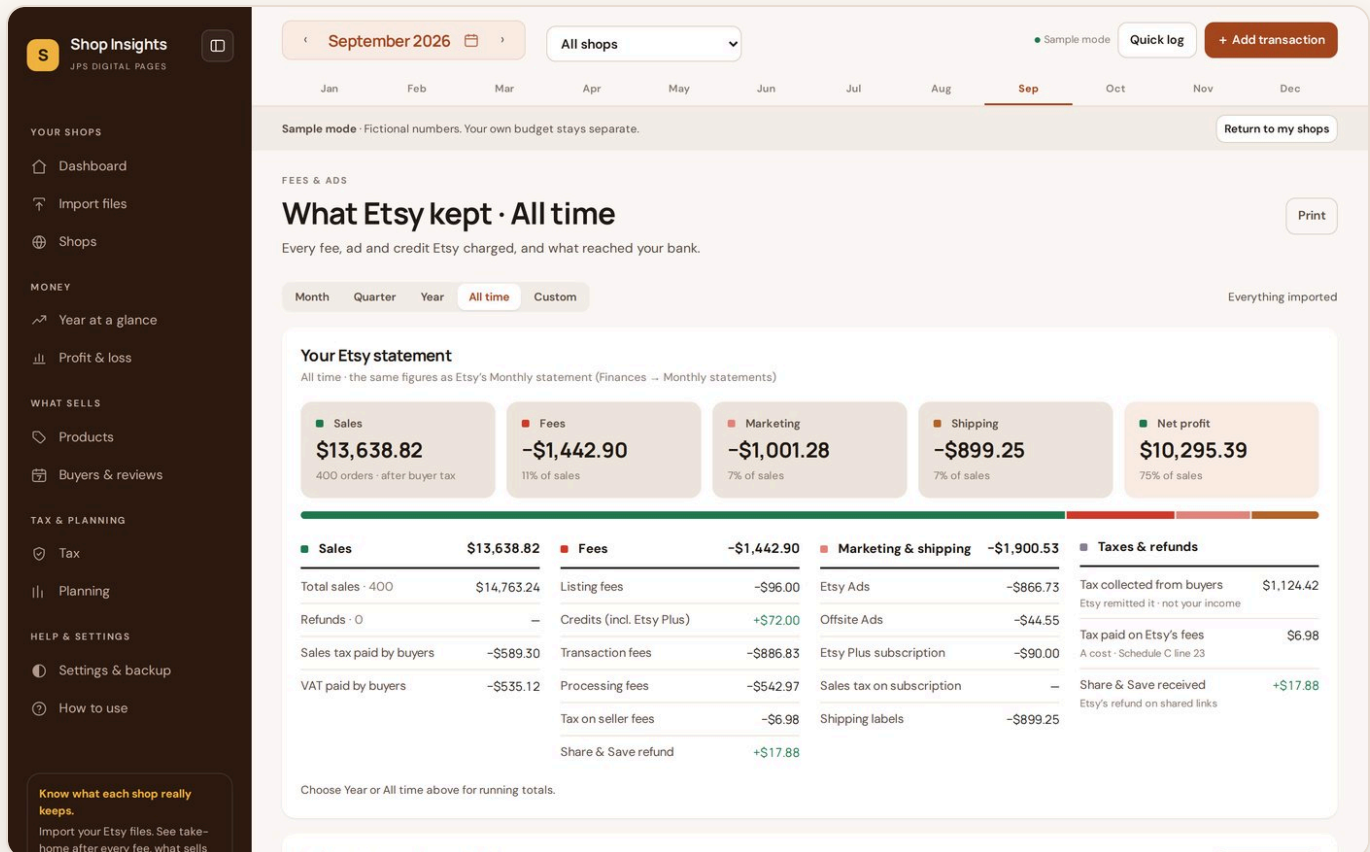

Pick one shop or all of them at the top; every screen and printout follows it. The month strip under it moves through the year.

WORD	WHAT IT MEANS
Revenue	Order payments, less the sales tax buyers paid and refunds.
Etsy costs	Fees, Etsy Ads, Offsite Ads and Etsy Plus, after credits.
Take-home	Revenue minus Etsy costs.
Net profit	Take-home minus the costs you log yourself (materials, packaging, software).

Every fee, accounted for.

Fees & ads shows your Etsy statement line by line: what Etsy kept and what reached your bank.

Switch it on first

Fees & ads, Insights, Year over year and Transactions start switched off to keep the sidebar short. Turn them on in **Settings & backup** → **Simplify your sidebar**.

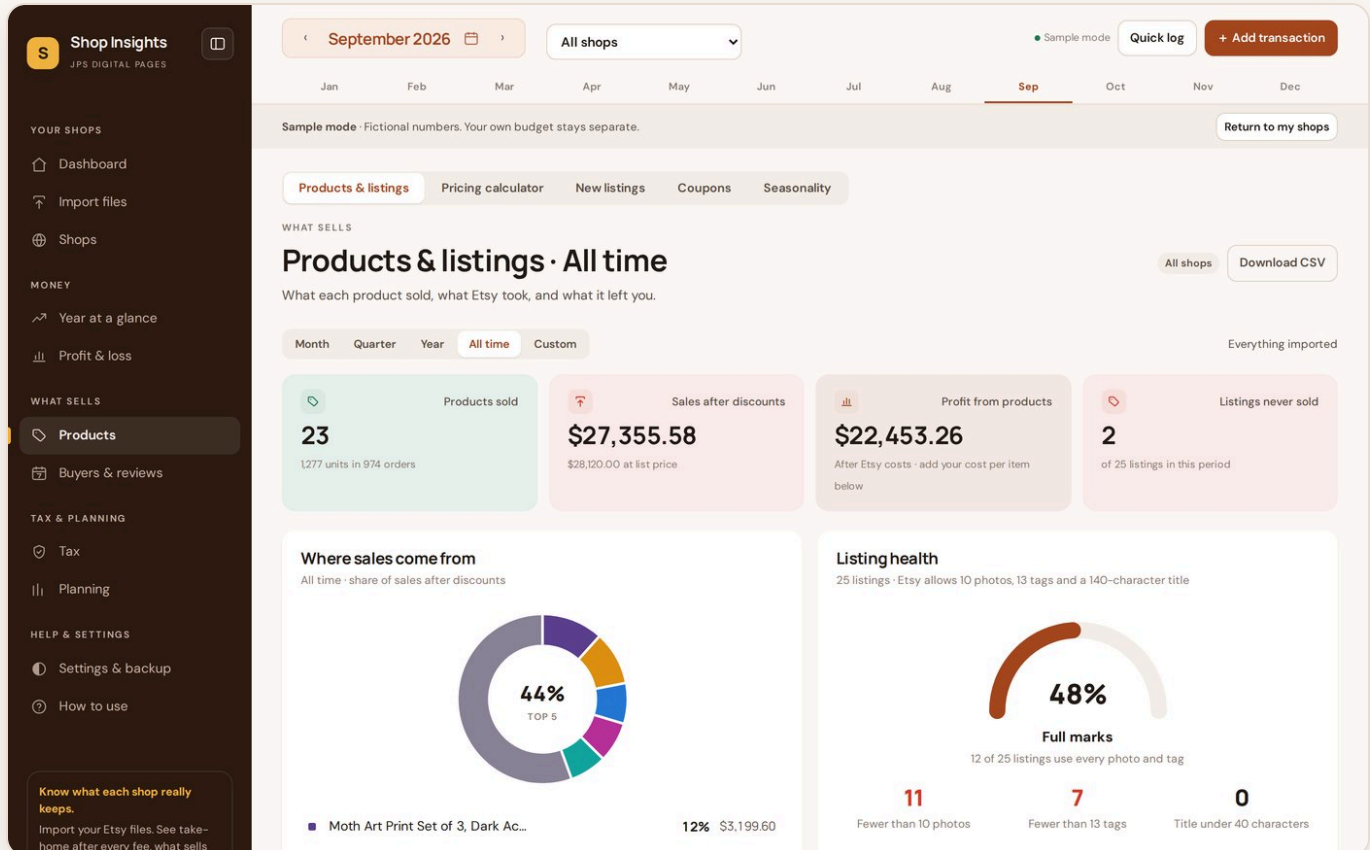

Sales tax and VAT buyers pay

Etsy adds it to the buyer's payment and pays it to the state. Shop Insights records it as a minus line under revenue, so it is never counted as your income or your cost.

Profit, product by product.

Products → Products & listings: what each product sold, what Etsy took, and what it left you.

Add what one item costs you

Type your cost per item in the products table, and its profit and margin update. Each product carries its share of Etsy's fees, ads and Etsy Plus, at the rate you actually paid in that period.

Download CSV keeps a copy for your records.

New listings

How listings you added recently are doing.

Coupons & seasonality

What each code cost you, and your busy and quiet months.

Price for the profit you want.

Products → Pricing calculator: what one sale leaves you, and the price that keeps your margin.

Buyer pays \$22.00

1. Start from one of your listings, or type a price.
2. Add what you charge for shipping, any discount, your ad spend and your own costs.
3. Set the margin you want to keep. It shows the lowest price that does.

Fees use your rates from **Settings → Your Etsy fees**, with presets by country. Tick Offsite Ads for an order that came through one.

Every shop, side by side.

Shops compares each shop's sales, Etsy costs and take-home, over the month, quarter, year or all time.

YOUR SHOPS

Shops

Every import belongs to one shop. Costs you log with All shops selected are shared, and count in the combined view only.

Month Quarter Year **All time** Custom

Everything imported

Shop by shop

All time · all shops together: \$13,638.82 revenue, \$11,194.64 take-home

F + Cover photo + Logo

Fern & Fable Prints

\$6,161.70

take-home · 81% kept

Revenue	\$7,572.62	Etsy costs	\$1,410.92
Orders	291	Average order	\$26.02
Listings	14	Rating	4.72 ★

C + Cover photo + Logo

Copper Kiln Ceramics

\$5,032.94

take-home · 83% kept

Revenue	\$6,066.20	Etsy costs	\$1,033.26
Orders	109	Average order	\$55.65
Listings	11	Rating	4.71 ★

Logos and covers

Give each shop a logo and a cover photo from its card.

Shared costs

A cost you log with **All shops** selected is shared: it appears in the combined view only.

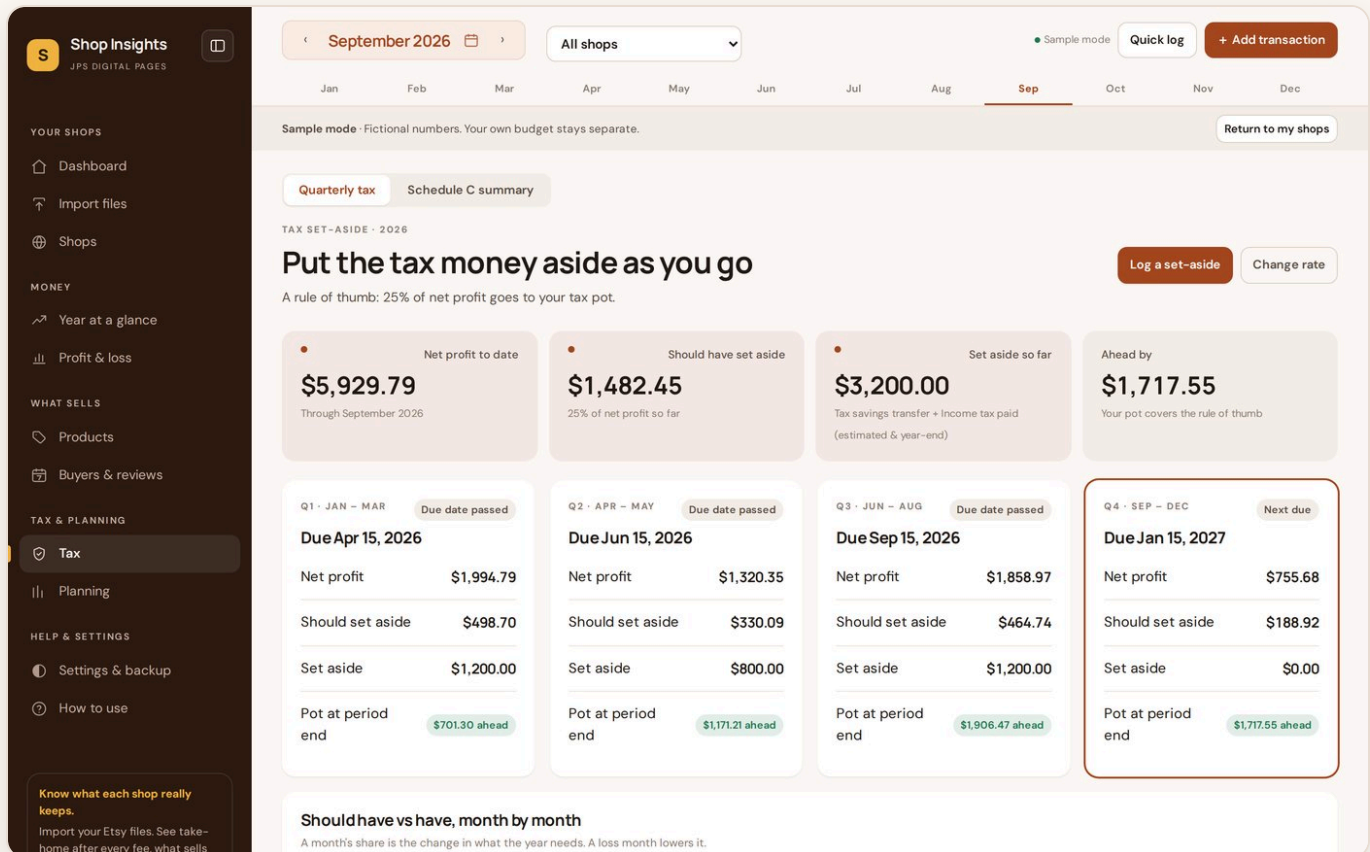

One shop's costs

Pick that shop at the top first, then log the cost.

Set tax aside as you go.

Tax → Quarterly tax: a rule of thumb for what to put aside each quarter, and what you already have.

A summary your accountant can work from

Schedule C summary groups the year by Schedule C line. Export it, or the transactions behind it, as CSV.

Good to know

It is an organized record, not tax advice or a filed return. Set your rate with **Change rate** on the Tax screen, and check the figures with your accountant. Shop Insights is not affiliated with Etsy, Inc.

The screens.

Grouped in the sidebar. Turn off any you don't use in Settings & backup.

SCREEN	WHAT IT IS FOR
Dashboard	The month at a glance: take-home, orders, best seller, net profit.
Import files	Bring in Etsy files and bank CSVs; move or delete imported files.
Shops	Each shop side by side, with logos and covers.
Year at a glance	The year so far, month by month.
Profit & loss	Revenue, Etsy costs, your costs and net profit.
Fees & ads*	Your Etsy statement, line by line.
Insights*	What stands out in your own numbers.
Year over year*	This year against last.
Transactions*	Every line in your books; log your own costs here.
Products	Products & listings, pricing calculator, new listings, coupons, seasonality.
Buyers & reviews	Where buyers are, repeat buyers, and every review.
Tax	Quarterly tax and the Schedule C summary.
Planning	Monthly targets, recurring costs, reserves and goals.
Settings & backup	Fee rates, tax rate, palette, sidebar and your backups.

* Starts switched off. Turn it on in Settings & backup → Simplify your sidebar.

Quick log at the top takes a short line like **mailers 18** and files a cost by matching words.

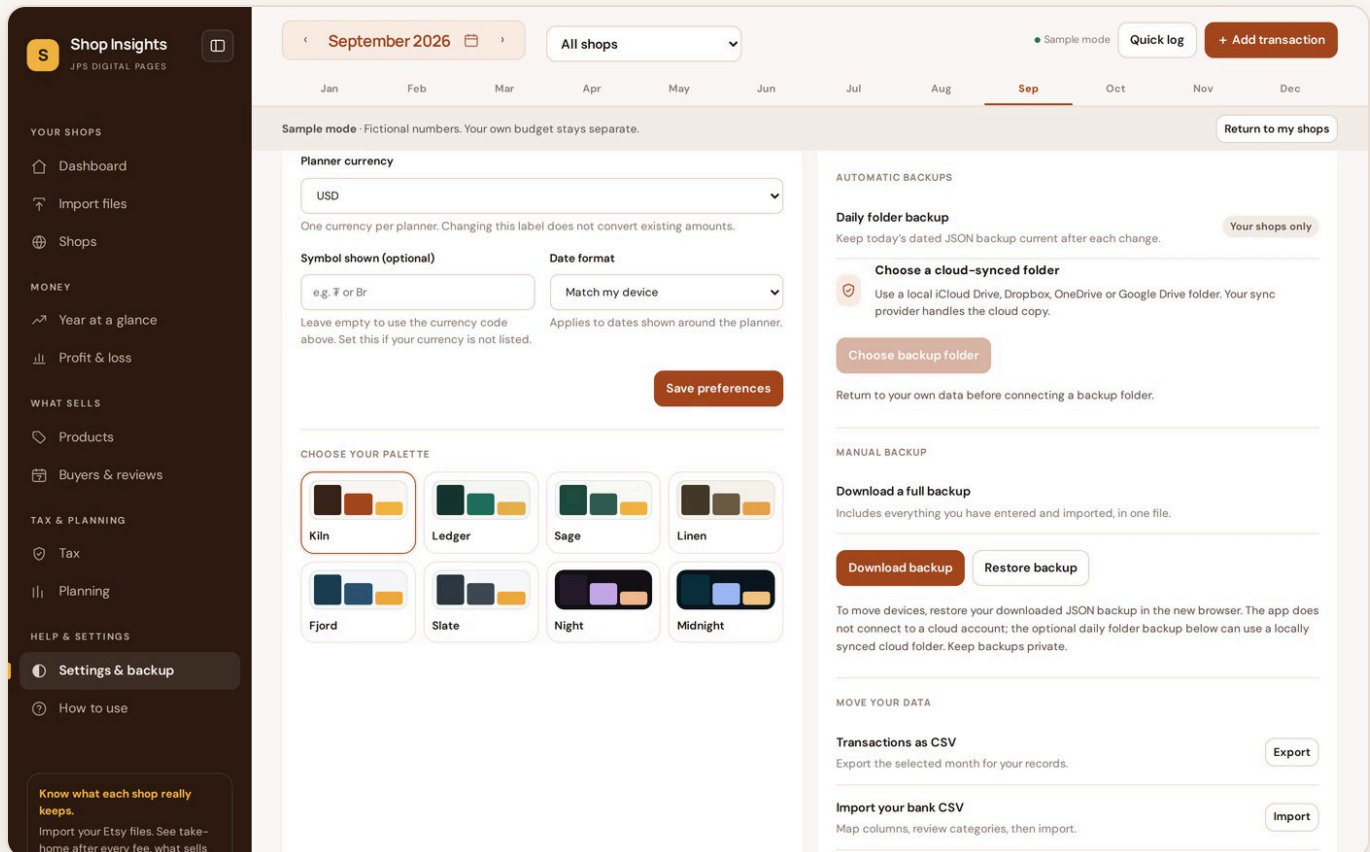

READ THIS ONE

Keeping your numbers safe.

Your data lives in your browser, on your device. There is no account and no server, and nobody else holds a copy, including us.

Please read

- Everything is saved automatically in that browser's storage, not in the HTML file.
- Clearing your browser's site data can delete it.
- It doesn't carry across browsers: shops imported in Chrome won't appear in Safari.

Download backup, any browser

Settings & backup → **Download backup**: one file with everything. **Restore backup** brings it back on any computer.

Folder backup, Chrome or Edge

Choose a synced folder once and a dated backup is kept current after every change. The status shows the date and time of the last one.

A few useful fixes.

WHAT YOU SEE

WHAT TO DO

It opens as code, not an app

Extract the ZIP first, then right-click the file → Open with → your browser.

My numbers are gone

Use the same browser and profile as before. Otherwise, Restore backup.

A month shows “estimated”

Import that month’s payment account statement for the exact fees and ads.

A file went into the wrong shop

Import files → Imported files → Move.

A listing shows as unsold

Listings are matched by the start of their title; a renamed listing may not match.

Fees look a little off

Settings → Your Etsy fees: pick your country’s preset or type your rates.

Folder backup unavailable

Use Chrome or Edge on a computer, or Download backup instead.

I want the tour again

Settings & backup → Welcome tour → Show tour.

We can help

For order support, message **JPS Digital Pages** through Etsy Messages, or email hello@jpsdigitalpages.com. Website: jpsdigitalpages.com

Thank you

If Shop Insights earns its place, a review genuinely helps a small shop. And if something isn’t right, tell us first: most things are fixable.
